## Text Responses

### Question: Expected grade

C

C

A or B+

A

### Question: Best thing about course

The field trip(s)

The field experience. Getting to be outside and see the concepts that we were learning was very interesting and helped to cement the concepts.

I greatly enjoyed the field work. In addition, the discussions in class are incredibly relevant to pressing current issues. Everything that we learn and achieve in this course is obviously pertinent to real-world issues.

Learning from Dr. Polozov

### Question: Things to change about course

Less vocab tests

The one thing I would change about this course is I think it would be helpful to chapter quizzes occasionally. Even though it would mean more work, it would help to review concepts and give us an idea of what we knew before the exam.

If possible, I would like more field work opportunities.

Make the field trip to a better place

### Question: Other comments

The chairs in this lab room are brutal for a 2 hour class.
